**CYBER SECURITY AWARENESS
STAFF TRAINING PROGRAMME REPORT**

‘Cybersecurity’, also known as digital security, is the practice of protecting computer systems, networks and data from digital attacks, unauthorized access and other threats. Cyber security is crucial in today’s digital age where organizations increasingly rely on a complex network of connected digital devices to run their operations and deliver services. While new technologies enable more productive and profitable work they also increase the risk of cyber threat. Hence, organizations must update and upgrade their security systems to remain protected.

Cyber security training for staff members is also essential for any organization as they form the first line of defense against cyber attacks. By training them on recognizing and mitigating threats, organizations can significantly reduce their risk of security breaches.

The Department of Commerce, in collaboration with the IQAC, will organize a **‘Cyber Security Awareness’ Training Programme** for staff members (teaching and non-teaching) on 1st July, 2025 from 1 to 2 pm in the Conference Room of the College. This Cyber Security awareness training will empower our staff to identify socially engineered cyber attacks, minimize human error and safeguard sensitive data from unauthorized access. Ultimately, it will help foster a culture of vigilance and resilience in our college.
